

Workplace Compliance

Take Control of Your Software and Hardware Assets

Asset | License | Contract

A comprehensive Software Asset Management solution that combines discovery, inventory, financial and contractual capabilities to support lifecycle management of your software and hardware assets, and to make strategic business decisions for your organization.

Solution Overview

Matrix42 Workplace Compliance combines software and hardware discovery, inventory, license tracking, software usage, and contract management into a holistic solution.

It helps enterprises avoid software and hardware over-spending, lower security risk and comply with software licensing and regulatory audits. It also improves procurement decision-making and spending by providing complete information about your software and hardware installations.

Key Benefits

Mitigate Risk and Assure Compliance

- Improve license compliance and eliminate audit concerns
- Increase accountability to ensure compliance
- Provide accurate view of all your software installations and usage data
- Gain control of your inventory

Reduce Software and Hardware Costs

- Provide an accurate and reliable view of every asset in your organization
- Eliminate the risk of software over- and under-spending
- Know the location of your hardware assets and efficiently manage the lifecycle

Negotiate Effectively with Vendors

- Gain accurate visibility into software usage patterns
- Get accurate view of all licensing dates, terms and conditions
- Track deadlines of agreements and contracts and act proactively

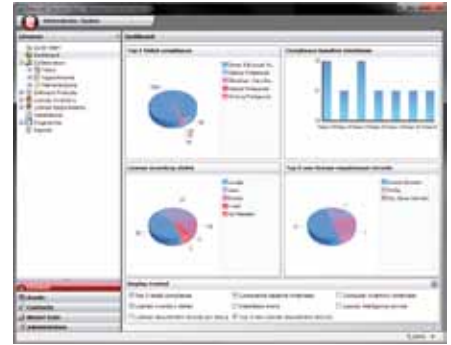

Key Features

Asset Management

Matrix42 Asset Management provides a multipurpose collection of software and hardware recognition, process and reporting features that seamlessly work together to provide a clear, accurate and complete view of your hardware and software inventory.

This includes:

- Asset discovery for all devices
- Software and hardware inventory
- Management of IT hardware and other physical assets
- Allocation of IT assets within the organization
- Data interface to 3rd party discovery systems

License Management

Matrix42 License Management provides robust and intelligent license tracking and compliance features, which make it simple to import, normalize and reconcile licensing information and data from a wide range of sources.

This includes:

- License tracking
- License inventory management
- License compliance and reconciliation
- Compliance and license inventory interactive reporting
- Software recognition (License Intelligence Service)
- Compliance, license and software utilization, saving potential & financial risks

Contract Management

Matrix42 Contract Management provides powerful features for managing IT contracts by recording, tracking and monitoring contract and purchase agreements effectively.

This includes:

- Management of suppliers, agreements and contracts
- Active deadline monitoring
- Process interface to procurement and financial accounting
- Business transparency, cost and deadline tracking
